Ann Landers Gay Lib Explained

DEAR ANN LANDERS: Your correspondent, "Gay in Decatur," correctly notes that a growing number of psychiatrists now join the Gay Liberation view that homosexuality is an "alternative life-style" rather than an illness. You reply that an equally large number of psychiatrists (probably more) disagree. Names of three psychiatrists (including mine) were cited to support the position that homosexuality is an illness.

"Homosexuality" is no more a specific diagnosis than is "heterosexuality." In some instances homosexuality is a symptom of underlying conflict, or the end result of genetic, biological, cultural and environmental factors. There are many varieties of homosexual behavior. The experimenting adolescent, the one-night stand, the compulsive pickup in a bar or restroom, the married homosexual — to name a few.

In my clinical experience as a practicing psychiatrist, the reasonably well adjusted homosexual rarely comes in to be "straightened out." If he consults a psychiatrist it is because of anxiety, depression, or other emotional distress, symptoms which also occur in the heterosexual.

The Gay Liberation movement has done much to make the public aware of the cruel discrimination against homosexuals. In spite of the excesses of the extreme militants (some claim it is a superior life-style, which it isn't), they have done a great deal to eliminate the medieval practices and barbaric punishment directed at homosexuals. This is particularly impressive when one remembers that as recently as 1941, the U.S. Navy routinely

sent all convicted homosexuals to Portsmouth Prison where they served a term and were then given a bad conduct discharge. We've come a long way since then.

It is bitter irony that the Gay Liberation movement has selected psychiatry as one of its prime targets for attack. Ironic, because it was psychiatry more than any other branch of medicine that tried to help and treat the homosexual. Contrary to Gay Liberation propaganda, psychiatrists never try to make the homosexual go "straight" against his will. Such a task would be impossible. This subject deserves more serious study and research so that homosexuality (however it is designated) may someday be viewed in a spirit of understanding and without prejudice. — Sincerely, Zigmund M. Lebensohn, M.D., Washington, D.C.

DEAR DR. LEBENSCHN:

Thank you for your compassionate and enlightening letter. I believe society is moving toward a better understanding of homosexuality but I also believe they could help themselves if they would eliminate the bizarre parades and demonstrations which make all homosexuals look like far-out kooks and dingbats, which they are not.

Medici Commutes Prison Sentences

BRASILIA (AP) — President Emilio G. Medici signed a Christmas decree commuting thousands of prison sentences. It ordered the release of any first offender sentenced to four years or less who had served with good conduct at least one-third of his term by Dec. 25.

give him the real 'totes'
